## Special Points Of Interest:

- Easy To Use
- Gives Students Options
- Students Can Create Their Own Study Games

## Quick How-To Guide

ClassTools.net is a great way to get students to be involved in creating study guides. New Templates are added frequently!

- Arcade Game Generator
- Random Name Picker
- Countdown Timer
- Dustbin Game
- Telescopic Topic
- Post It
- Diamond 9
- Fishbone

- Venn Diagram
- Animated Books
- Timelines
- Lights Out
- Target
- Hamburger
- Living Graph
- Learning Cycle
- Jigsaw Diagram
- Priority Chart
- Source Analyzer

## Arcade Game Generator

In the tutorial I created a video on how to do the Arcade Game Generator template. It deals with singular and plural nouns. I gave the students a list of singular nouns and wanted them to put in "s", "es", or "ies" at the end to

make them plural.

The students then can play several different arcade games to learn the words.

Looking over this website gives many great ideas and templates for students to create their

games and send them to their parents so they can help their children study!
