

By Amy Keller

Check It Out!!!

This website is designed to offer many ways to excel in math. It offers lesson plans to follow, a dictionary where one can look up the meaning of a word, and many games that make learning math fun! There is even a section with tips on how to lower stress levels if one is stressing over math. Parents, there is a section for you on how to prepare your child for math at any level.

Coolmath's Math Lessons & Help Area

Math lessons to help with everything from Addition through Algebra and more

Remember that you can look up a quick definition at my [math dictionary](#) and find formulas in my [geometry / trigonometry reference](#) area!

Arithmetic Lessons (These are over at [Coolmath4kids.com](#))

Addition, subtraction, times tables, multiplication, division, and long division

Pre-Algebra Lessons

Fractions, decimals, percents, signed numbers (integers) and more until you hit Algebra stuff!

Algebra Lessons

I've got just about everything here from Algebra 1 (Beginning Algebra) up through Precalculus level Algebra

Precalculus Review / Calculus Preview

This is the precalculus math you really need to know to survive Calculus 1. It's also great to study for your precalc final.
