Beginning Tutorial

Using Picnik is a fast, easy way to upload, edit, and share photos online. You begin by choosing the photo you'd like to upload—it uploads fast and easy! After it uploads, begin with the basic autofix, crop, red-eye, and other adjustments. After, you can place stamps on your photo. They range from holiday themes, animals, shapes, and many other things. The text ribbon lets your

size, format, and style a wide variety of styles. After you choose to do these, you can apply borders and frames. After you are done editing your photo, you may save it online, on your computer, and post it to you Facebook, Twitter, or other accounts.

This photo is of my 3 year-old-niece, Greta Claire, she LOVES The Wizard of Oz and was Dorothy for Halloween.

Premium Version—\$25.95 a year!

Although there is no need to register for Picnik.com, there is two versions one is able to register for. The first is the free version. The free version gives you a wide variety of photo editing tools to work

with. The second version is a premium version of Picnik.com. This is for people who do simple editing to intricate photo work. At a low price, it is just over \$2.00 a month. The premium version allows the

editor to upload several photos at once and gives many more options for editing software. It is a simple, fast way to show off your creativity to your family and friends.
