# Quintura

Www.quintura.com

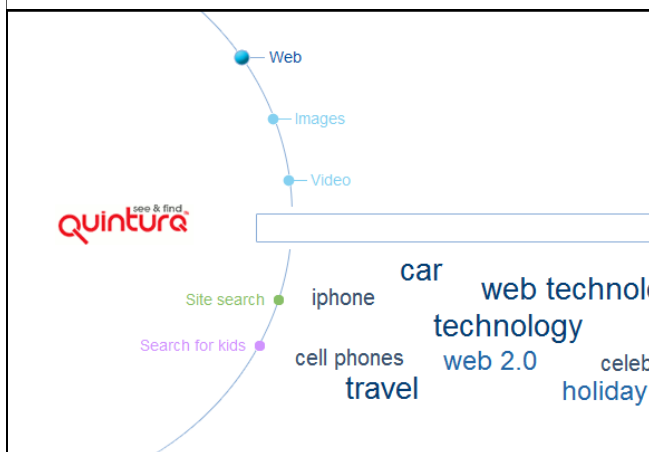

Quintura is an online search engine. What makes it unique is the 'connection ideas' that appear below a search. When a criteria is typed in and searched, Quintura also comes up with common search connections. (See picture below for example.) Websites, documents, videos, and images can all be searched for through Quintura.

Quintura only shows websites that have been approved and passed as reliable and appropriate information. This makes it a good tool to use in the classroom and school setting. It is easy to use and helpful for those who know what they are looking for but are having troubles when searching.

Also check out Quintura search engine for kids!!! It is kid friendly and only comes up with websites that have been approved for kids!
